

Socio-Emotional Development

Our lesson plans are designed to help encourage healthy socio-emotional development. Children identify oneself as a member of a specific family and cultural group and understand the significance of integration of familial customs and backgrounds. We promote diversity in learning Hispanic heritage and cultural norms. Group activities allow children to develop positive relationships with their peers. Children are encouraged to work cooperatively with others and share their ideas and feelings about their learning experiences.

Children from different cultures may experience school in different ways. There may be differences in learning styles or ways of communicating. We value and respect cultural differences-it allows us to affirm self-esteem and confidence within a child while simultaneously learning a new language.
